PROFESSIONAL SUMMARY

.NET Backend Developer with **2.5+ years** of experience designing and building scalable backend systems and enterprise API integrations. Proficient in **C#, ASP.NET Core, Web API, Entity Framework Core**, and **RESTful services**, with hands-on experience in **identity and access management (IAM) 2.0**, and using **SCIM, OAuth SAML**. Proven track record integrating enterprise platforms **Icertis CLM, SAP Ariba, SAP ECC, SAP S/4HANA** for global clients across procurement, contracting, and identity domains.

EDUCATION

Master of Computer Applications (MCA) — Andhra University 2024 – Present
Bachelor of Science — Computer Science, Aditya Degree College for Women 2020 – 2023

TECHNICAL SKILLS

Languages: C#, Java, C

.NET Technologies: .NET Framework, .NET Core, ASP.NET Core, Web API, Entity Framework / EF Core, LINQ

Backend & Architecture: RESTful API, Object-Oriented Programming (OOP), Design Patterns, SOLID Principles

Databases: SQL Server, MySQL, JSON, XML

Integrations: SCIM, OAuth 2.0, SAML, JWT, Icertis CLM, SAP Ariba, SAP ECC, SAP S/4HANA, SIMBA, DocuSign

Cloud & DevOps: Microsoft Azure (App Services, Azure DevOps), Git, GCP, AWS

PROFESSIONAL EXPERIENCE

Accenture – Software Engineer | September 2025 – Present | Hyderabad

Accenture – Associate Software Engineer | July 2023 – August 2025 | Pune

Clients: NVI, UCB, Woodside, Sandoz

- **Designed** and developed custom **C#** integrations using out-of-the-box and custom adapters to extract, transform, and synchronize data from external enterprise systems into **Icertis CLM**, reducing manual data entry effort by **~35%** across 2 global clients.
- **Engineered** end-to-end contract workflows and supplier master data initiation processes between **SAP Ariba** and **Icertis CLM**, streamlining supplier onboarding and cutting onboarding turnaround time by nearly **30%**.
- **Automated** user lifecycle management by architecting **SCIM**-based provisioning and de-provisioning integrations with **SIMBA** using **OAuth 2.0** authentication, reducing manual provisioning effort by **40%** and strengthening identity governance compliance.
- **Developed** MAL approver integrations from **SAP S/4HANA** using **REST APIs, C#**, and custom hooks, enabling automated approval routing and reducing approval processing delays by approximately **25%**.
- **Collaborated** across cross-functional, global client teams to deliver **10+** enterprise CLM integration solutions, maintaining **99%+** integration uptime while ensuring compliant data flow across procurement, contracting, and identity systems.

PROJECTS

Cloud Enumeration Security Tool

2025

Technologies: Python, Streamlit, cloud_enum, AWS, Microsoft Azure, GCP, Wasabi, DigitalOcean

- Built a multi-cloud enumeration tool in Python to identify exposed cloud resources and detect security misconfigurations across AWS, Azure, and GCP.
- Extended the open-source cloud_enum tool with new provider support for Wasabi and DigitalOcean, broadening scan coverage.
- Designed a Streamlit-based GUI for real-time scan visualization, improving usability for non-CLI users.

CERTIFICATIONS & ACHIEVEMENTS

- Received Accenture's **ACE Award** for contribution to client deliverables and team performance.
- Microsoft Azure Fundamentals (AZ-900) | Microsoft
